

**DRYLOK® SILOXANE 7  
BRICK & MASONRY  
PENETRATING SEALER**

DRYLOK® Siloxane 7 Brick & Masonry Penetrating Sealer is an invisible water repellent which creates a long lasting barrier against moisture. This new penetrating sealer is a special blend of silane/siloxane which sets the industry standard for superior vertical/horizontal surface moisture protection. DRYLOK® Siloxane 7 Brick & Masonry Penetrating Sealer penetrates the substrate without creating a film on the surface, and without changing the look or texture of the surface.

**FEATURES:**

- Formula:** silane/siloxane
- Finish:** no sheen, invisible
- Protection level:** 7% solids
- Application tools:** brush, roller, sprayer
- Location:** exterior above grade vertical, horizontal surfaces
- Where to use:** chimneys, brick and stone facades, and walls
- Specifications:** conforms to Fed. Spec. TT-C-555B, Par 3.3.3 Resistance to Wind Driven Rain
- CSI Masterformat®:** **07 19 00 WATER REPELLENTS**

**BENEFITS:**

- Ideal for natural stone or very porous substrates
- Breather-type finish-keeps water droplets out /allows water vapor to escape
- Contains Silane/Siloxane
- Resists 98 mph wind-driven rain
- Maintain the original look with invisible protection
- Deep penetration/no film build
- Listed in Masterspec® and BSD SpecLink®
